

AXIBASE FABRICA

KEY CAPABILITIES

- Real-time infrastructure views based on Microsoft Visio diagrams
- Cross-browser Web 2.0 user interface built on AJAX and SVG
- Integration with leading operational management tools
- Drill-down, impact analysis and launch-in-context capabilities

KEY BENEFITS

- Provides real-time, service-oriented visibility into IT assets
- Delivers role-based views for IT executives and solution architects
- Consolidates topology views and events from multiple tools
- Accelerates recovery for complex applications and failure scenarios
- Efficiently allocates service modeling tasks inside the IT organization

TOOLS & MODULES

- Centralized service dashboard
- Topology explorer
- Cross-layer impact manager
- Uptime tracking module
- Inventory/asset information

SERVICES & CONSULTING

- Automated modeling
- CMDB/Portal integration
- ARIS/BPEL conversion

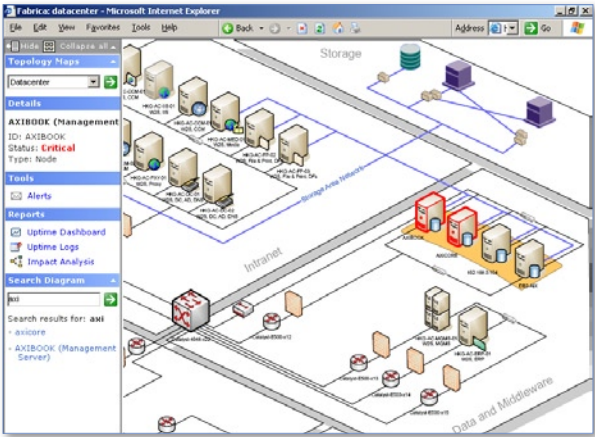

THE POWER OF VISUALIZATION

Axibase Fabrica provides Visio-based modeling and visualization software for service-centric monitoring of datacenter and network infrastructures. By creating real-time topology views based on Microsoft Visio diagrams, Fabrica provides IT executives and operations managers with a new way to visualize root causes, identify emerging fault patterns and resolve complex problems faster.

Fabrica includes real-time adapters for HP OpenView Operations, HP Network Node Manager, IBM Tivoli Monitoring, IBM Tivoli NetView, Microsoft Operations Manager, and provides an extensible Universal Adapter for consolidating events and business data from custom sources.

Axibase Fabrica Interface And Features

Visio Modeling *Web 2.0 Interface* *Scalable Vector Graphics*

Deep Drill-Down *Cluster/VM Models* *Cross-Layer Analysis*

Cross-browser *Real-Time Alerts* *CMDB Bridge*

Topology Explorer *Launch-in-Context* *Uptime Tracking*
