Axibase Enterprise Reporter for Power Users

Duration: 1 day

What you will learn

This course is designed to advance skills from regular user level to power user level. Topics focused on during this class include capacity planning, performance analysis, and service availability reporting on IT infrastructure resources. Students in this course expand their skills to managing dashboards and templates, modifying resource properties, and constructing capacity profiles to optimize frame and partition resource allocations.

Prerequisites

Regular user knowledge of Axibase Enterprise Reporter
