

AXIBASE FABRICA 2.0

KEY CAPABILITIES

- Real-time IT service, business process, and application topology views
- Import of Visio diagrams using manual or CMDB mapping options
- Cross-browser user interface built on Ajax and fast-rendering SVG format
- Asynchronous situation update processing with TEC forwarding
- Single Sign-on with TEPS user names and permissions
- Built-in Axibase Warehouse Designer and Reporting Engine

BENEFITS FOR IT ORGANIZATIONS

- Accelerates diagnostics and recovery in complex failure scenarios
- Provides service-oriented visibility into hardware and software assets
- Dramatically reduces the cost of creating and maintaining service views and IT dashboards

MODULES AND EXTENSIONS

- Automated modeling
- Real-time map overlays
- Integration of custom event sources
- TDW Reporting
- Availability Reporting

SERVICE VISUALIZATION & REPORTING DASHBOARDS FOR ITM 6.1

Axibase Fabrica is an easy-to-use visualization solution for monitoring IT infrastructures from a service and business impact perspective. By combining visual models based on Microsoft Visio diagrams with real-time situation updates from ITM 6.1, Fabrica delivers a new way to visualize business impact, identify emerging fault patterns and resolve complex problems faster.

Fabrica includes IBM-validated adapters for rapid integration with Tivoli® Enterprise Monitoring 6.1 and Tivoli Data Warehouse 2.1.

User Interface And Features Summary

Nested Views *Cross-browser GUI* *Visio Import*

Situation Console *Service Dashboard*

Propagation Rules *Status Views*

Map overlays *Real-time charts*

Topology Explorer *TEPS SSO* *Impact Analysis*

Role-based Visibility *Warehouse Reporting* *Availability Reporting*
